FISH HEAD CUTTING AND FILLETING MACHINE

Highlighted features

- ➔ - Machine used to cut fish head and fish fillet.
- Fish size: 500x170x80 mm (LxWxT).
- Maximum fish size: 680x180x100 mm (LxWxT).
- ➔ * Fish head cutting machine:
 - The machine has a force cylinder to cut the fish head, the load is up to 190 Kg.
 - The laser light helps workers locate the right fish head cutting position.
 - The machine has a capacity of 30 fish/minute, depends on the worker.
- ➔ * Fish Filleting Machine:
 - The machine includes 3 functions integrated in one machine: abdominal dissection, organ removal and fish fillet.
 - The rate of fish meat loss is low.
 - The machine has a capacity of 35 fish/minute, depends on the worker.

FISH HEAD CUTTING AND FILLETING MACHINE

Technical specification

Dimension	2074x690x1291 mm (L*W*H)
Electric power consumption	3.7 kW
Input power	3 phase, 380V ± 10% + Neutral wire (N)
Fish filleting machine	2.2 kW, 3 phase, 220/380 VAC, cover inox 304
Fish head cutter adopts pneumatic cylinder, material SUS304	
Ngày sản xuất	07/2021
